1 Introduction

Welcome to *An Era of the Seas*, an open-world adventure and exploration game where every island holds its mysteries, dangers... and opportunities. In this vast and living world, you play as the son of a debt-ridden merchant, determined to restore your family's honor and fortune.

Your mission: explore the 8 islands of the archipelago, each with its own resources, inhabitants, challenges, and secrets. Whether through trading, treasure hunting, or battling enemies, every means is fair game to repay the family debt... and perhaps, along the way, forge your own legend.

Sail between islands, build your network, upgrade your ship, make tough decisions... The world of *An Era of the Seas* is open, but unforgiving. The path you choose is yours alone.

Get ready to set sail. The adventure begins now.

6 Game Mechanics

6.1 Quests & Story Progression

The player embarks on a journey as the son of a vanished merchant burdened by debt. Set in the mysterious world of the Shattered Seas, the player's goal is to gain power and wealth. The main storyline unfolds through a Story Quest, where players interact with NPCs and explore diverse islands to uncover the fate of their family and the secrets of the seas.

6.2 Combat System

Combat in Shattered Seas is divided into two main types:

- **Land Combat:** Engage enemies on foot using your sword in real-time battles. Defeating enemies may yield valuable loots and resources.
- **Naval Combat:** Battle maritime foes aboard your ship. Maneuver your vessel and defeat the enemies to claim rewards.

6.3 Exploration

Exploration plays a crucial role in your journey to grow stronger and wealthier. Travel from island to island by boat and face new enemies.

6.4 Upgrades

Players can enhance their strength by upgrading:

- Weapons
- Sigils
- Boats
- Crew Members

Upgrades improve stats such as damage, health, and defense. Upgrade materials include:

- Coins and Pure Water Drop for general upgrades
- Wood and Steel for boat enhancements

Advanced gear and upgrade items can be purchased from shops located in the central towns of each island.

6.5 Hunger system

Managing your character's Hunger bar is essential for survival:

- When full, it regenerates health over time.
- When empty, the player gradually loses health.

Players can fish at designated spots and consume the catch to restore hunger and stay in fighting shape.

6.6 Shop

Each island town features a variety of shops where players can buy or sell equipment and manage their resources:

- **Armorer** - Sells weapons
- **Mage** - Offers magical sigils
- **Boat Dealer** - Provides ships and naval upgrades
- **Material Seller** - Sells crafting materials (Pure Water Drop, Steel, Wood)
- **Purchaser** - Buys any items and offers money or Pure Water Drop depending on the trade

Managing your economy effectively is key to progression and survival.

6.7 Multiplayer

Players can enjoy local multiplayer through two competitive mini-games:

- **Treasure Hunt** - Compete to find the hidden treasure chest first.
- **Boat Race** - Navigate through a challenging course; the first to capture the final flag wins.

These modes offer fun, fast-paced gameplay for friends on the same system.
